Today's organizations need data to innovate. But they also need it to simply function. Without data, business stops. Fortunately, organizations have access to more data in more ways than ever before. Unfortunately, this access has made data much harder to defend.

Despite heavy investments in cybersecurity, bad actors are still finding ways to gain access to data. This is where Rubrik comes in.

Product

Rubrik (RBRK), the Security and AI Operations Company, leads at the intersection of data protection, cyber resilience, and enterprise AI acceleration. Rubrik Security Cloud delivers complete cyber resilience by securing, monitoring, and recovering data, identities, and workloads across clouds. Rubrik Agent Cloud accelerates trusted AI agent deployments at scale by monitoring and auditing agentic actions, enforcing real-time guardrails, fine-tuning for accuracy and undoing agentic mistakes.
