

Rubrik Zero Trust Data Security for Microsoft

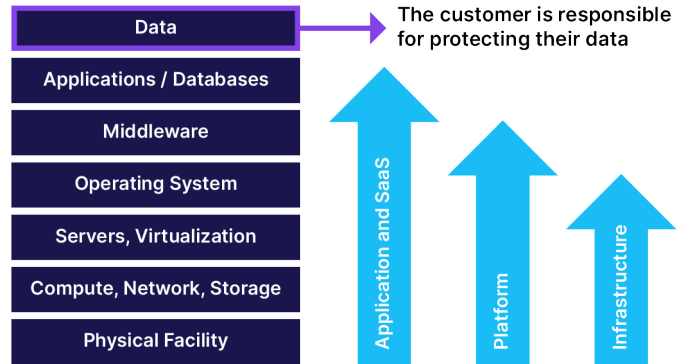

Secure your data, wherever it lives, across enterprise, cloud, and SaaS

Together, Rubrik and Microsoft deliver Zero Trust Data Security to protect mission-critical applications and hybrid cloud environments to defend against escalating ransomware threats. The tight integration and strong partnership has grown with the rise of cloud adoption and complex data migrations.

SHARED RESPONSIBILITY MODEL

Microsoft adopts the shared responsibility model for security. This means that data security is also the responsibility of the customer.

Data is the most sought-after asset in today's digital economy. Whether it's financial or consumer information, or intellectual property, your company's fortune is often determined by your ability to secure that data from bad actors.

BENEFITS

BACKUP AND SECURE DATA IN MICROSOFT AZURE

Secure your data, wherever it lives, across enterprise, cloud, and SaaS with Rubrik Security Cloud.

PROTECT CRITICAL MICROSOFT 365 DATA

Cyber-proof your Microsoft 365 with air-gapped, immutable data security for resilience and rapid recovery at scale.

TURBOCHARGE RECOVERY

Accelerate and enrich threat investigations with more data risk insights and speed up recovery time with automated responses.

RUBRIK SECURITY CLOUD — Your Zero Trust Data Security Platform

Whether running on-premises or in Azure, Rubrik provides a single, unified solution to protect and manage data.

With Rubrik Security Cloud, protect data in Microsoft Azure and ensure recoverability across Microsoft applications—including Azure VMs and Managed Disks, Azure SQL, Microsoft 365, Azure NetApp Files, Azure Stack HCI, SQL Server, and physical or virtualized Windows.

- Safeguard Microsoft environments and data from insider threats or ransomware with air-gapped, immutable, access-controlled backups.
- Continuously monitor data for ransomware, manage sensitive data exposure, and hunt for indicators of compromise
- Surgically recover apps, files, or users while avoiding malware reinfection.

RUBRIK CLOUD VAULT

Accessed via Rubrik Security Cloud, Rubrik Cloud Vault is a fully-managed service built using Microsoft Azure Storage. Reduce the risk of backup data breach, loss, or theft by storing immutable copies of data in a Rubrik-hosted cloud environment, isolated from core workloads. Prevent unauthorized access to your data.

- **Logically air-gapped archive** so you can readily recover from cyber attacks
- **Fully-managed service** reduces data risk and operational complexity
- **Predictable cost** that includes all charges to stay within budget

RUBRIK FOR MICROSOFT 365

Microsoft 365 is a prime cyber attack target - and puts business continuity at risk. While Microsoft provides data governance tools, there is no recovery SLA and Microsoft recommends offline backups as the first step to ransomware recovery.

With Rubrik, secure Microsoft 365 data with policy-based protection via SaaS-based Rubrik Security Cloud. Rubrik offers security, simplicity, and performance for search and restore operations across Exchange Online, OneDrive, SharePoint, and Teams. With Rubrik, cyber-proof Microsoft 365 data with air-gapped data resilience, automated protection and rapid recovery at enterprise scale.

TURBOCHARGE RECOVERY — Don't Pay the Ransom

Rubrik Enterprise Edition integrates with Microsoft Sentinel to bridge the gap between Security and IT Operations. Together, Rubrik and Microsoft provide a common view of data risks to surgically and rapidly recover while avoiding malware reinfection to keep businesses up and running.

MICROSOFT AND RUBRIK PARTNERSHIP

In 2021, Microsoft pledged \$20B to invest in cybersecurity. As part of this effort, Microsoft invested in Rubrik with the aim to jointly develop Zero Trust data protection solutions including Microsoft 365, hybrid cloud data protection and integrated cloud services, all built on Microsoft Azure. Rubrik manages hundreds of petabytes on Azure and they share over 2500 joint customers. All Rubrik products are available on the Microsoft Azure Marketplace and can be used to decrement Microsoft Azure Contract Commitments (MACC).

Rubrik is a cybersecurity company. We are the pioneer in Zero Trust Data Security™. Companies around the world rely on Rubrik for business resilience against cyber attacks, malicious insiders, and operational disruptions. Rubrik Security Cloud, powered by machine intelligence, enables our customers to secure data across their enterprise, cloud, and SaaS applications. We automatically protect data from cyber attacks, continuously monitor data risks and quickly recover data and applications.
