

Detect, Contain, Recover:

# The First Integrated End-to-End Identity Resilience Solution

Move to full identity resilience by combining CrowdStrike's proven identity threat detection with Rubrik's deep identity context and clean recovery

Identity is a primary<sup>1</sup> attack vector. Yet most organizations still rely on fragmented tools and disconnected workflows that slow response and increase risk. Detection happens on one platform. Investigation and remediation happen across multiple tools. Recovery is managed separately, and often manually, by a different team. This results in slower response times, incomplete remediation, and a higher risk of attacker persistence and reinfection.

The integration between CrowdStrike and Rubrik closes this gap.

## A Better Way: Complete Identity Attack Response

Together, CrowdStrike Falcon® Next-Gen Identity Security and Rubrik Identity Resilience deliver a unified approach to identity security, spanning detection, containment, investigation, remediation, and clean recovery.

### CrowdStrike Falcon Next-Gen Identity Security

Secure every human, non-human, and AI identity across the full attack chain with unified visibility, privileged access, ITDR, and SaaS security.

### Rubrik Identity Resilience

Get deep context and historical activity visibility into identity changes. Correlate activity across identity systems. Enable precise restore of affected identity objects or full recovery to a trusted state.

Together, they close the loop from alert to action to full resolution.

←----- Unified Intelligence Sharing ----->

#### Detect

Identify behavioral anomalies, suspicious session activity

#### Contain

Enforce token revocation & policy implementation

#### Investigate

Correlate CrowdStrike's alerts with Rubrik's identity state intelligence for a complete identity timeline

#### Remediate

Undo malicious changes surgically and reduce guesswork

#### Recover

Restore identity systems to a trusted state

# Rubrik + CrowdStrike: Better Together

Value Drivers	Operational Levers
 <b>Unified Visibility &amp; Faster Investigation</b> Combine CrowdStrike's real-time detection with Rubrik's identity activity logs.	 <b>Correlated Intelligence &amp; Forensics</b> Rubrik ingests CrowdStrike alerts and maps them to time-sequenced identity logs, allowing teams to distinguish between malicious and legitimate changes and accurately map the blast radius.
 <b>Trusted Restore &amp; Business Continuity</b> Reduce business downtime from days or weeks to just hours. Eliminate backdoors and recover trust.	 <b>Real-Time Containment &amp; Surgical Recovery</b> Stop active threats by blocking anomalous identity behaviors and isolating compromised sessions in CrowdStrike. Use Rubrik to granularly undo unwanted changes like privilege escalations or policy modifications without disrupting healthy configurations.
 <b>Streamlined Operations &amp; Compliance</b> Lower the burden on Security and IT teams with orchestrated workflows. Maintain an audit trail of changes with actor attribution and recovery actions.	 <b>Single-Console Response Workflow</b> Consolidate detection, containment, investigation, and recovery into a single, coordinated process between Rubrik and CrowdStrike, allowing Security and IT teams to act as one with fewer consoles and less context switching.

## Empowering Security & IT Teams with the First Closed-Loop Identity Response Solution

Together, Rubrik and CrowdStrike deliver the industry's first closed-loop identity attack response to recovery solution, moving organizations beyond detection and containment to full identity resilience. Security, IAM, and IT teams no longer have to choose between speed and confidence, or containment and recovery. They gain a complete view of the attack timeline and a trusted path to restoring identity systems cleanly. With Rubrik and CrowdStrike, identity attacks are not just detected; they are fully resolved.
