

Rubrik Enterprise Edition

The Comprehensive Cyber Recovery Solution

Rubrik Enterprise Edition delivers complete ransomware remediation and includes multiple data protection options with a single subscription license. With Enterprise Edition, you get the resiliency against ransomware that makes it easier and faster to recover from cyber attacks while also identifying your sensitive data exposure. Rubrik Zero Trust Data Security™ helps ensure your backups are safe from attack and cannot be compromised.

Identify scope of impact: See how your data has changed to quickly identify what was impacted where, allowing you to analyze the overall threat impact. By leveraging machine learning, you can detect and receive alerts on anomalous behavior and quickly start the recovery process of your most critical applications. Use multiple recovery options to get your applications and data back to the most recent clean state.

Scan for malware on demand: Gain an additional layer of detection that is independent of the production environment, and thus resistant to attacks that compromise the production environment. Scan your backups across time for indicators of compromise (IOCs) to understand which systems have been impacted, identify a safe recovery point, avoid malware reinfection, and support digital forensics.

Automatically monitor for lurking threats: Proactively scan for threats out-of-band from production infrastructure, based on vetted threat intelligence, to accelerate investigations. Rubrik combines intelligence from third party threat feeds with intelligence from Rubrik Zero Labs (Rubrik's data threat intelligence unit) and Rubrik's InfoSec team to automatically identify IOCs within backup snapshots.

Quarantine infected snapshots: Reduce the risk of reintroducing malware into your environment by isolating and controlling access to infected snapshots within your backups.

Reduce sensitive data exposure: Manage exfiltration risk by discovering what types of sensitive data you have and where it lives, with no impact to production. Create a robust compliance policy using pre-defined or custom analyzers, report on policy violations, and track compliance progress.

Test, validate, and orchestrate recovery workflows: Improve cyber readiness and response with recovery testing and validation in isolated environments. You can test whether your recovery playbook works—including sequence, timing, and failure points, clone snapshots into isolated environments quickly, conduct forensics investigations in parallel to recovery, and automate workflows such as mass recovery of VMs.

OVERVIEW OF RUBRIK SECURITY CLOUD ENTERPRISE EDITION

ENTERPRISE EDITION

Secure your data, continuously monitor risks to your data, and confidently recover to a clean state after cyber attacks.

 Data Protection	Enterprise, Cloud, SaaS, and Unstructured Data Protection Protect your data from cyberattacks, malicious insiders, and operational disruptions with automated, air-gapped, access-controlled backups.	✓
	Mass Recovery Restore business operations quickly by recovering apps, files, or objects at scale.	✓
 Data Threat Analytics	Anomaly Detection Determine the scope of cyber attacks using machine learning to detect deletions, modifications, and encryptions.	✓
	Threat Monitoring Detect threats early by automatically identifying indicators of compromise within backups using an up-to-date feed of threat intelligence.	✓
	Threat Hunting Prevent malware reinfection and support digital forensics by analyzing the history of data for indicators of compromise to identify the initial point, scope, and time of infection.	✓
 Data Security Posture	Sensitive Data Monitoring Reduce sensitive data exposure and manage exfiltration risk by discovering what types of sensitive data you have and where it lives.	✓
	Data Security Command Center Identify security gaps, quantify data risk, and provide actionable recommendations to improve data security posture.	✓
 Cyber Recovery	Threat Containment Ensure safe and quick data recovery by quarantining data infected with malware.	✓
	Cyber Recovery Simulation Improve cyber readiness and incident response by creating, testing, and validating your cyber recovery plans in isolated recovery environments.	✓
	Rubrik Cloud Vault Secure your data with an isolated, immutable cloud vault.	200TB (Backup Tier)

Please note that cloud workload protection included in Rubrik subscription bundles are only for workloads migrating from on-premises to the public cloud. Universal Cloud Licenses are available as an add-on to protect workloads residing in public cloud environments from the onset of the subscription term.

HOW RUBRIK LICENSING WORKS

Rubrik subscription licenses are offered as a 3-year subscription that includes software, hardware of your choice and support. Throughout the Rubrik subscription, you will receive access to Rubrik's new software features. Cloud licenses in Rubrik editions are eligible only for cloud migration use cases. Renewal prices are predictable, which means no surprises at renewal time.

BENEFITS OF RUBRIK

- **Archive with Rubrik Cloud Vault, on us:** Archive securely with 1 year promo of free 200TB Rubrik Cloud Vault with Enterprise Edition.
- **Future proof for cloud:** Move to the cloud non-disruptively with cloud-native protection bundled into the Rubrik subscription.
- **Flexible annual payments:** Meet your budget with flexibility to pay in fixed yearly installments.

Rubrik is on a mission to secure the world's data. With Zero Trust Data Security™, we help organizations achieve business resilience against cyberattacks, malicious insiders, and operational disruptions. Rubrik Security Cloud, powered by machine learning, secures data across enterprise, cloud, and SaaS applications. We help organizations uphold data integrity, deliver data availability that withstands adverse conditions, continuously monitor data risks and threats, and restore businesses with their data when infrastructure is attacked.
