

# Introducing Rubrik Go Enterprise Edition: The Complete Ransomware Remediation Solution

Rubrik Go Enterprise Edition delivers the complete ransomware remediation and includes multiple data protection options with a single subscription license. With Enterprise Edition, you get the resiliency against ransomware that makes it easier and faster to recover from a ransomware attack while also identifying your sensitive data exposure. Rubrik Zero Trust Data Management™ helps ensure your backups are safe from attack and cannot be compromised by ransomware.

**Identify scope of impact:** See how your data has changed to quickly identify what was impacted where, allowing you to analyze the overall threat impact. By leveraging machine learning, you can detect and receive alerts on anomalous behavior, and quickly start the recovery process of your most critical applications. Use multiple recovery options to get your applications and data back to the most recent clean state.

**Reduce sensitive data exposure:** Identify whether any sensitive data has been breached and prioritize remediation plans with no impact to production. Create a robust compliance policy from a custom or pre-defined template, report on policy violations and track compliance progress.

**Accelerated ransomware recovery:** Rubrik now takes ransomware recovery to the next level with fully orchestrated VM recovery to a secondary site or to VMware Cloud on AWS. Now you can define application blueprints ahead of time to ensure VMs get back online quickly and in the right sequence. With Enterprise Edition, Rubrik will help you secure your backup data and give you the essential tools to react to an attack.

## OVERVIEW OF RUBRIK GO ENTERPRISE EDITION SOFTWARE

	<b>ENTERPRISE EDITION</b> Backup & Recovery with Complete Ransomware Remediation and Disaster Recovery
Backup & recovery, replication, search, analytics, and copy data management across on-premises and hybrid clouds	✓
A centralized SaaS-based platform to manage global, distributed Rubrik environments	✓
Cloud archival for long-term retention	✓
Natively integrated continuous data protection offering a stream of recovery points for near-zero RPOs	✓
Instantiation of on-premises workloads in the public cloud	✓
Ransomware detection and recovery with deep intelligence on threat behavior and impact	✓
Discover, classify and report on sensitive data exposure	✓
Orchestrated disaster recovery (DR)/failback	✓

## HOW RUBRIK GO WORKS

Rubrik Go is offered as a 3-year subscription that includes software, hardware, support, and hardware refresh to the current hardware generation at the time of subscription renewal. Throughout the Rubrik Go subscription, you will receive access to Rubrik's new software features. All Rubrik Go licenses can be transferred to the cloud during the term of the subscription at no additional license cost. Cloud licenses in Rubrik Go editions are eligible only for cloud migration use cases. Rubrik Go renewal prices are predictable, which means no surprises at renewal time.

## BENEFITS OF RUBRIK GO

- **Access new technology:** Always stay current on software features. Refresh to next generation appliances without needing to re-buy.
- **Future proof for cloud:** Move to the cloud non-disruptively with cloud-native protection bundles into the Rubrik subscription.
- **Recover faster from ransomware:** Identify anomalies, analyze what sensitive data was exposed, and orchestrate recovery instantly.
