

Rubrik for Microsoft 365

Streamline management and deliver faster recoveries at enterprise scale.

Millions of enterprises today rely on the Microsoft 365 suite for cloud-based communication and document management, capturing immeasurable volumes of data – data that must be backed up, protected, and instantly accessible. However, native tooling falls short of providing holistic protection for your data, leaving your organization vulnerable to irreversible data loss.

THE SIMPLEST WAY TO PROTECT MICROSOFT 365

Rubrik orchestrates policy-based protection of Microsoft 365 via its Polaris SaaS platform, offering unprecedented simplicity and performance for search and restore operations for Exchange Online, OneDrive, SharePoint, and Teams. Safeguard from data loss with automated protection at enterprise scale and enact rapid recovery to maintain peak data availability.

CENTRALIZE MANAGEMENT

Rubrik brings its trademark simplicity and backup performance to data protection in Microsoft 365. Take a SaaS-based approach to protecting your most critical productivity suite and ensure data is secure, easily discoverable, and always accessible through a single, intuitive dashboard.

TURBOCHARGE RECOVERY

Quickly restore individual files, full mailboxes, or entire SharePoint sites to any destination in just three clicks. Easily locate your data with global predictive, file-level search to quickly recover from data loss and ensure business continuity.

AUTOMATE PROTECTION AT SCALE

Eliminate manual, time-consuming job-scheduling and streamline policy management across thousands of users with Rubrik's SLA policy engine. Rubrik dynamically scales compute instances and manages storage capacity to create seamless operations at scale.

HOW IT WORKS

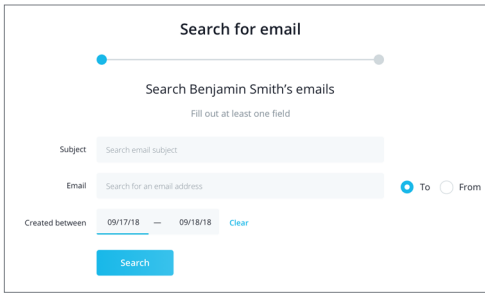

SECURE SETUP IN MINUTES

Rubrik leverages industry-standard modern authentication to establish a secure connection with your Microsoft 365 subscription. All users and organizations will be automatically discovered so that you can begin assigning policies immediately. Protection assigned at the subscription level is automatically inherited by all managed users to reduce vulnerability.

POLICY-BASED MANAGEMENT AT GLOBAL SCALE

Rubrik eliminates manual, time-consuming job scheduling. You can assign data management policies with one SLA policy engine. SLA policies can be applied to the entire Microsoft 365 subscription, site, or to individual end users. All user-created and default folders in mailboxes within that organization are automatically protected.

INSTANT SEARCH AND RESTORE FOR RAPID RECOVERY

In the event of data loss, you can quickly browse through point-in-time snapshots and restore an entire OneDrive, site, mailbox, or granularly down to individual folders and items. Rubrik delivers immediate access with item-level search, allowing you to search by email address, date range, and keywords from a subject line or event title. Successfully restore data from both active and inactive users, either back to the original location or exported to another user's mailbox or shared mailbox. Rubrik provides role-based access control to designate granular user permissions for self-service access.

BUILT SECURELY ON AN ELASTIC, CLOUD-NATIVE ARCHITECTURE

Eliminate management burden and maintain predictable cloud costs with a simple, user-based license and unlimited storage.

The Polaris architecture is tailored specifically for cloud services, built alongside Microsoft's native APIs and leveraging dynamic toolsets like Azure Kubernetes that are optimized to work and scale in your cloud environment.

Rubrik hosts the required Azure environment to introduce a logical air-gap for better resilience against security events.

WHAT OUR CUSTOMERS ARE SAYING

"With Rubrik's Microsoft 365 backup solution, we were able to improve our email restoration capability to improve response. One scenario resulted in the hard delete of an email inbox, resulting in a significant resource recovery effort. With Rubrik, we were able to quickly restore the 20 GB inbox and keep related project operations on schedule. This was a big win for our team and JE Dunn as a business; we avoided unnecessary project risk with Rubrik's Microsoft 365 protection."

Jason Hull
Senior Systems Manager
JE Dunn

"With Rubrik, it was a snap to set up our Microsoft 365 integration and protect 4,000 accounts with one SLA. We can now restore a user's emails in minutes and can recover a complete inbox (several GB) in little more than an hour. Previously, this would have taken two or more hours since we would have needed to restore a complete volume to recover a mailbox. What was previously a cumbersome, time-consuming process has now been completely simplified with Rubrik's ability to perform granular Microsoft 365 restores."

Tony Carrero
Enterprise Systems Manager
