

Rubrik Cloud Data Management enables organizations of all sizes to leverage Amazon Web Services (AWS) for backup and recovery.

Here's how...

PREDICTIVE GLOBAL SEARCH

Enables fast, granular data access and recovery.

API-FIRST ARCHITECTURE

Allows automated custom lifecycle management workflows on-premises and on AWS.

ADVANCED ENCRYPTION STANDARD

Secure your data before sending it to AWS.

Make data protection a key part of your cloud journey with Rubrik.

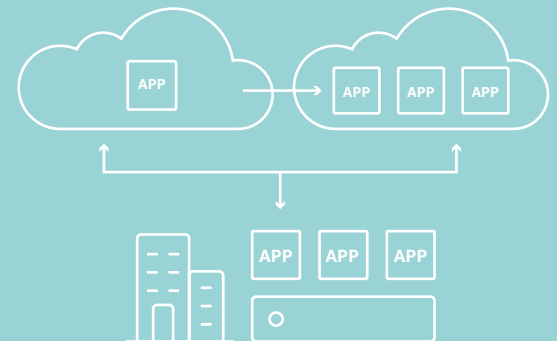

Looking to start your cloud journey?

Automatically transfer backup data to AWS.

Running hybrid architecture?

Move backup data between AWS and on-premises.

Already on the cloud?

Back up native-AWS workloads.

I was looking for something that would make backup and recovery effortless. Rubrik Cloud Data Management and AWS met my criteria.

Terry Young
Sr. Network & Systems Administrator
Castilleja School

The search functionality blew us away. It is instant and can quickly find and recover data at the file level.

Tim Gable
Network Systems Manager
Fujirebio Diagnostics, Inc.

Results our customers are seeing:

Up to 60% reduction in daily management time compared with traditional solutions.

50%
