Become Cyber Resilient on AWS

Streamlined Management, Protection, and Recovery, Wherever Your Data Lives

Wherever your business data lives, it needs protection. Together, Rubrik and Amazon Web Services (AWS) have partnered to provide cyber resilient, cost-effective, and simplified protection for your critical AWS apps and workloads. And Rubrik's data security is custom built for AWS, so critical information is always available and recoverable, all from one SaaS platform.

Gain Data Visibility and Control

Automatically discover and classify sensitive and unprotected data across your entire hybrid cloud environment— from a single pane of glass.

Confidently Back Up and Recover

Establish immutable, isolated recovery points via a policy-driven framework that ensures rapid recovery from cyber incidents and operational disruptions.

Reduce Risk of Data Theft

Cut data exposure risk by contextualizing threats, identifying over privileged users, and monitoring for suspicious activity.

Lower TCO

Identify redundant backup data and intelligently transition data to cost-optimized storage without maintaining expensive snapshots.

> " With Rubrik, it only took 36 hours to migrate our entire infrastructure, around 2,000 virtual machines, into Amazon S3. Rubrik allowed us to integrate seamlessly with Amazon S3 and securely mobilize our applications from on-prem to cloud."
>
> – Dave Vassall, Systems Analyst, UC San Diego

Our Joint Solutions

Our joint solutions protect a wide range of AWS environments, ensuring comprehensive security and recovery.

AWS Native Data Protection

With Rubrik, customers can simplify and automate data protection and enable cloud mobility in **AWS**. Backup to the cloud for cost-effective, long-term archival. Easily on-ramp to public cloud with automated VM conversion. Natively protect cloud apps and workloads, and recover with confidence. It's cyber resilience for AWS cloud data– delivered with lower TCO and the convenience of a single pane of glass.

Data Security Posture Management (DSPM)

Rubrik's DSPM solution offers advanced capabilities to proactively mitigate data risks and protect sensitive and regulated information. With features such as comprehensive data inventory, discovery of high-risk identities, and visibility into overexposed, unprotected, and obsolete data, Rubrik provides extensive coverage to safeguard your valuable assets.

Rubrik Cloud Vault*

Rubrik Cloud Vault will enable an offsite layer of cyber resilience with secure, immutable data copies in an isolated, air-gapped AWS environment. With Rubrik Cloud Vault, businesses can be confident that they'll have reliable recovery from threats to primary AWS environments, including cyber incidents, operational failures, and natural disasters.

Rubrik Annapurna*

Rubrik Annapurna will enable fast access to secure data embeddings from all your enterprise data and metadata in Rubrik Security Cloud across on-premises, cloud, and SaaS. Rubrik Annapurna is designed to mitigate the risk of data breaches, compliance violations, or unauthorized access during AI operations. Together, Annapurna's powerful and secure data retrieval and Amazon Bedrock's access to high-performing foundation models will deliver powerful and secure pre-embeddings that turbocharge GenAI initiatives.

Use Cases

Rubrik and AWS's solutions address critical business needs, from automation to advanced data protection and recovery, streamlined management, and cost efficiency.

SLA AUTOMATION
Replace hundreds of manual, backup jobs with global SLA policies and standardize frequency, retention, and replication.

PROTECT CRITICAL DATA
Secure essential business data with integrated Rubrik and AWS solutions, ensuring robust protection against threats.

RECOVER FROM CYBERATTACKS
Quickly restore operations after cyberattacks, minimizing downtime and mitigating impact with advanced recovery options.

ENSURE BUSINESS CONTINUITY
Operate smoothly with reliable backup and recovery solutions that maintain business continuity during disruptions.

*Coming 2025

NAS Cloud Direct for AWS

Rubrik NAS Cloud Direct for AWS provides efficient data protection through a petabyte-scale unstructured data protection-as-a-service solution. Customers will see high-performance and scalable enterprise backup and archive services specifically designed for unstructured file and object data. By harnessing the capabilities of Rubrik NAS Cloud Direct for AWS, businesses can confidently safeguard their critical unstructured data while scaling their backup and archival processes to meet the ever-growing demands of modern data environments.

SUPPORTED AWS SERVICES:
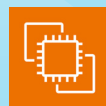

AWS EC2   AWS RDS   AWS S3   AWS EBS

AWS Aurora   AWS EFS   AWS FXs   Amazon EKS

Microsoft SQL Server   vmware   SAP HANA   ORACLE

SIMPLIFY BACKUP MANAGEMENT
Streamline backup processes with unified tools from Rubrik and AWS, making data protection more efficient.

SUPPORT COMPLIANCE EFFORTS
Rubrik automatically discovers, classifies, and reports on where certain types of sensitive data reside to help comply with regulations.

OPTIMIZE COSTS
Cut costs with scalable, efficient data management solutions that enhance your IT investment.

Key Joint Customers

Rubrik and AWS enable today's leading organizations to secure and recover their critical data with confidence.

"The idea of incorporating Amazon EC2 backups into the same data protection solution as out on-premise backups was a no-brainer. We're currently protecting JIRA applications with Rubrik on Amazon EC2, but see huge growth potential moving forward."

— Michael Kientoff, Senior Systems Administrator, Meredith

Secure your AWS infrastructure and data

Combine AWS's industry-leading infrastructure with Rubrik's best-in-class data management and protection. Rest assured knowing you have the right tools to ensure that your critical data is secure and always available and recoverable when you need it the most.
