Healthcare and Life Sciences Award

Streamlined, Secure Management for Critical Workloads

Rubrik and Microsoft are united in our mission to protect the world's most critical data and infrastructure. Our solutions enhance perimeter, network, endpoint, and application security from Microsoft, while offering robust pre- to post-breach data security. Together, we help organizations restore data and return to business as usual efficiently.

Enhance Microsoft Data Security

Leveraging advanced Zero Trust architecture and air-gapped protection, our solution provides robust defenses against cyber threats, enabling effective monitoring and remediation of data risks, including ransomware, sensitive data exposure, and indicators of compromise.

Centralize Management and Visibility

Especially for the modern work environments, our seamless integration with Microsoft 365 streamlines data protection and management, enhancing collaboration and productivity while ensuring continuous access to critical information.

Find and Restore Data Fast

For cloud operations, Rubrik's native integration with Microsoft Azure delivers efficient backup and rapid recovery, streamlining processes and cutting costs.

Achieve Data Visibility and Control

Rubrik Data Security Posture Management (DSPM) provides the data visibility and control you need to reduce the risk of sensitive data exposure and accelerate secure Microsoft 365 Copilot adoption.
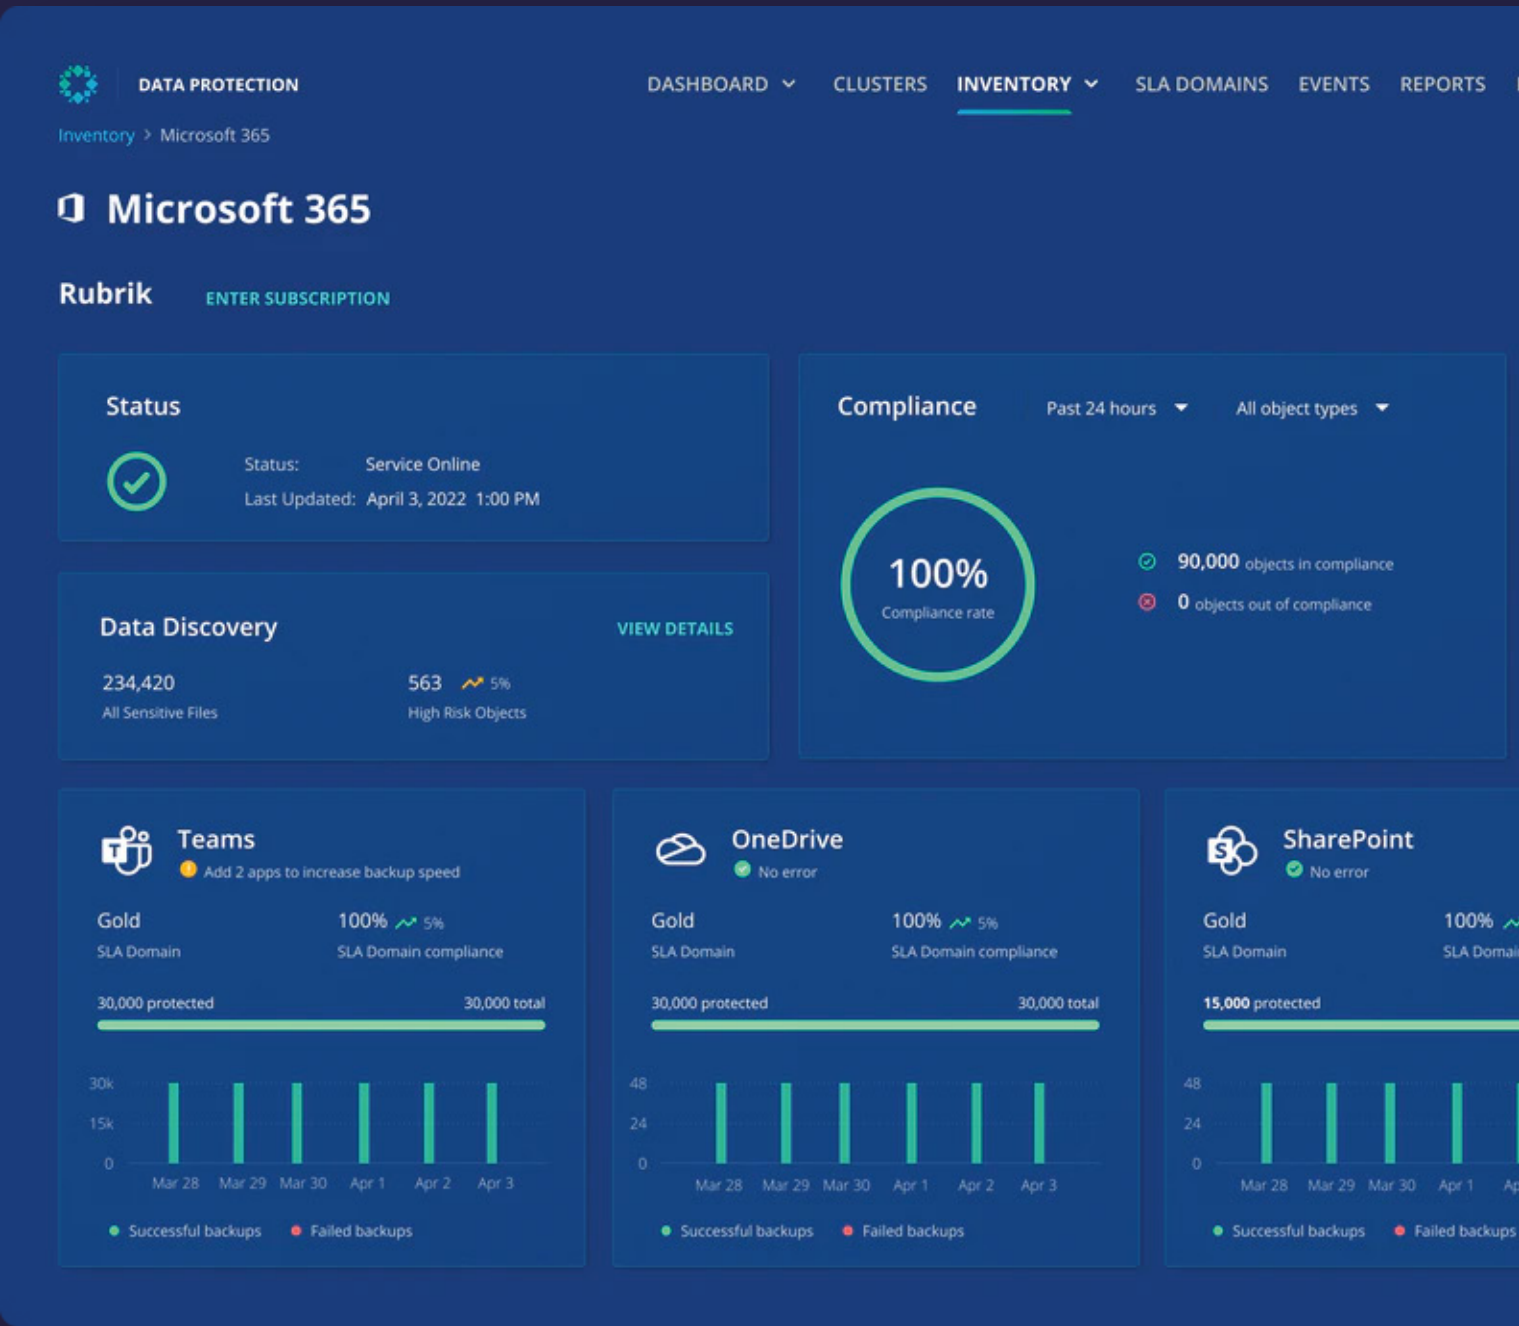

> "Sensitive Data Monitoring helps us proactively secure where our sensitive data resides and who has access, and can help us identify if data was exposed in an exfiltration attack."
>
> — Andy Powell, CTO, Canterbury Christ Church University

Our Solutions

Discover how our solutions protect a wide range of Microsoft environments.

Microsoft 365

Rubrik's solution for Microsoft 365 ensures comprehensive data protection as well as rapid and seamless recovery for Exchange Online, OneDrive, SharePoint, and Teams. Our M365 Backup solution keeps all your data securely backed up and quickly recoverable, so your teams can stay productive without interruption. In addition, our integration with Microsoft 365 Backup Storage ensures faster backup and restore speeds, backed by Microsoft's trust. This approach safeguards critical data, as well as offers scalable and reliable recovery for large environments.

Rubrik Cloud Vault

Rubrik Cloud Vault provides an offsite layer of cyber resilience with secure, immutable data copies in an isolated, air-gapped Azure environment. This solution ensures reliable recovery to your primary Microsoft environment from threats, including cyber incidents, operational failures, and natural disasters.

Azure

Our solution on Azure delivers robust backup and recovery capabilities, ensuring comprehensive data protection and reliable continuity across Azure services. It simplifies management for VMs, SQL, and VMware solutions, while enhancing security for Active Directory, Files, NetApp Files, and Blob Storage.

Epic on Azure

Rubrik protects Electronic Health Record (EHR) data against cyber threats, safeguarding appointment scheduling, patient intake, prescription processing, billing, and more. By combining backup and cybersecurity into a single platform, this solution ensures the resilience of both patient care and business operations.

Rubrik DSPM for Microsoft 365 Copilot

To help mitigate inherent risks associated with AI, Rubrik DSPM for Microsoft 365 Copilot is designed to provide the data visibility and control needed to ensure sensitive data is correctly classified, labeled, and segmented—and has the right access permissions. This enables organizations to leverage the power of Copilot while securing sensitive data from the risk of exposure.

Sentinel

The Rubrik-Microsoft partnership, with Microsoft Sentinel integration, combines Rubrik's data management capabilities with Sentinel's security analytics. This integration accelerates issue resolution, enabling unified visibility and streamlined responses.

Windows

Rubrik and Microsoft offer a unified solution for protecting and recovering data across Windows environments. By integrating with physical servers, Hyper-V, and Windows VMs, Rubrik's platform ensures comprehensive backup and recovery, providing robust data protection and efficient restoration across all layers of your Windows infrastructure.

SQL Server

Rubrik supports robust SQL Server protection for databases by combining advanced data management with Microsoft's technology. This solution ensures comprehensive security against cyberattacks and operational errors, enabling rapid recovery for hundreds or thousands of SQL Server databases while maintaining high performance and efficiency.

Use Cases

LEVERAGE AI
Harness Microsoft AI with Rubrik for advanced data insights, automated threat detection, and optimized management.

REDUCE RISK OF SENSITIVE DATA EXPOSURE
Gain visibility and control of your M365 data to help minimize risks and ready your environment for a secure Copilot rollout.

PROTECT CRITICAL DATA
Secure business data with our solutions and ensure strong protection against threats.

RECOVER FROM CYBERATTACKS
Quickly restore operations after cyberattacks with advanced recovery options thereby minimizing downtime and impact.

ENSURE BUSINESS CONTINUITY
Operate smoothly with reliable backup and recovery solutions that maintain business continuity during disruptions.

SIMPLIFY BACKUP MANAGEMENT
Streamline backup processes with unified tools for more efficient data protection.

MANAGE BUSINESS REQUIREMENTS
Helps you stay compliant with data protection and auditing features.

OPTIMIZE COSTS
Cut costs with scalable, efficient data management solutions that maximize your IT investment.

Partnership

Our solutions empower over 3,000 organizations across industries to secure and recover their critical data with confidence.

Unite Data and Infrastructure Security

We deliver a complete security solution by combining Microsoft's multi-layered safeguards with Rubrik's data protection and rapid recovery.

SECURE YOUR DATA
Advanced backup solutions and Microsoft's security framework protect your data.

MONITOR & MITIGATE DATA RISK
Integrated insights and tools help you manage and mitigate risks effectively.

RECOVER RAPIDLY
Swift restoration ensures business continuity and minimal disruption.

About Rubrik

Rubrik helps organizations achieve business resilience against cyberattacks, insider threats, and operational disruptions. Our innovative platform secures your data across enterprise, cloud, and SaaS environments, combining backup, recovery, and cybersecurity to ensure your business remains unstoppable.
