

be-ity's Deploys Rubrik for Modern Data Management and Scalability

RESULTS

- 65% faster backup performance
- 82% data reduction
- 70% management time savings

CHALLENGE

- Slow backup performance with previous legacy solution
- Lack of scalability to meet data growth
- Complex and time consuming daily management for backup

SOLUTION

- All-in-one data management for its virtual and physical environment
- Policy-based management for time savings
- Future integration with cloud for data archival

A trusted digital company, be-ity's, wants to make innovation its driving force and identifies blockchain, big data and deep learning as the future of digital trust. The group applies its technology, its knowledge, and know-how to the the strategic areas of activities of organizations, including legal security of digital transactions and probative value archival or management of services in the healthcare sector or personalized prevention.

Manuel Rigaut, CIO of the be-ys group and be-ity's, the company dedicated to storage, security, data treatment, and management of sensitive data, is responsible for establishing an IT strategy in line with the business needs of the be-ity's group. "As we experienced significant growth, we needed a data management solution that met our scalability needs while providing operational efficiency," said Rigaut. "To support our network of more than 230,000 healthcare professionals, we had to have a reliable IT infrastructure."

BE-YS SEARCHING FOR AN INNOVATIVE SOLUTION

Within its digital transformation, be-ity's wanted to benefit from the latest technological innovations. Additionally, be-ity's expected its data management solution to support its production environment with Nutanix consisting of 2,400 VMs. "We were looking for a solution that would be aligned with the evolution of the be-ys group and its activities," said Rigaut.

A MODERN DATA MANAGEMENT PLATFORM FOR SPEED AND SCALE

be-ity's began evaluating new solutions to meet their overall IT needs. "It was clear that Rubrik was the best solution for our needs. It provided high performance and scale-out architecture while ensuring all our data was secure throughout its lifecycle," said Manuel Rigaut.

be-ity's deployed Rubrik Cloud Data Management for automated backup, disaster recovery, replication, and search.

"As we experienced significant growth, we needed a data management solution that met our scalability needs while providing operational efficiency. To support our network of more than 230,000 healthcare professionals, we had to have a reliable IT infrastructure."

- Manuel Rigaut, CIO

Benefits include:

- **Lightning fast deployment:** “Rubrik was very easy to setup. It integrated seamlessly with our Nutanix infrastructure and auto-discovered our entire virtual and physical environment. We were up and running within a day.”
- **65% faster backup performance:** “Today, we are seeing much higher backup performance with over 20% faster full backup and over 65% faster incremental backup for a large VM.”
- **Significantly faster recoveries:** “With the solution’s Google-like search, it is easy to recover quickly with reduced time delivering 30% faster recoveries.”
- **Secure data mobility:** “We use Rubrik to replicate between our two data centers. Rubrik ensures high level of security, delivering end-to-end encryption.”
- **Significantly improved deduplication and compression:** “We have a solution that provides fast deduplication and compression rates even as the amount of data increases. Since Rubrik employs built-in intelligent automation, it automatically adjusts performance for large data sets. Since we deployed Rubrik, we are seeing a 82% data reduction.”
- **Easy integration with cloud:** “One of the reasons we chose Rubrik was for its easy integration with any cloud. We plan to set up archival to cloud.”
- **Policy-based management for ease of use:** “Rubrik eliminates the management complexity with legacy backup solutions. We set policies, and Rubrik takes care of the rest. It is so simple and efficient.”
- **70% management time savings:** “We have reduced the time spent on backup. Now, this backup only takes minutes, freeing up our time and resources to work on other important projects.”
- **Simple to scale:** “One of our primary requirements as we selected a new solution was ease of scalability. With Rubrik, we can grow as we go and infinitely scale with our data growth.”
- **Rapid return on investment:** “We expect a return on our investment in less than year. Rubrik provides us operational efficiency and slashes daily management time from hours to minutes. Since it frees up our resources and time, it will reduce our overall costs quickly.”
- **Rubrik for physical:** “We deployed Rubrik for our entire virtual and physical environment. In one platform, we can easily manage and gain visibility into all our applications.”

Rubrik delivers instant application availability to hybrid cloud enterprises for recovery, search, cloud, and development. By using the market-leading Cloud Data Management platform to provide instant access with self-service, customers mobilize applications, automate protection policies, recover from Ransomware, search and analyze application data at scale on one platform. From days to seconds.
