

COMTEC Achieves High Performance and Moves to the Cloud with Rubrik

INDUSTRY

Technology

RESULTS

- 50% management time savings
- 90% reduction in data center footprint
- 15% TCO savings
- Cloud archival to AWS

THE CHALLENGE

- Management complexity with legacy solution
- Inability to move to the cloud

COMTEC, located in Tokyo, Japan, is a solution provider. Kohki Goto, Manager, Information System Group, leads a team in charge of building and managing infrastructure for over 1,800 employees.

Prior to Rubrik, COMTEC was dissatisfied with its legacy solution, which was quickly becoming obsolete. "With our previous solution, we could not successfully perform some of our restores. It was also time-consuming to manage and troubleshoot the solution on a daily basis," said Goto. "Rubrik's cloud data management solution and automated workflows have completely streamlined our backup processes and we now have confidence that we can meet our SLAs."

COMTEC is now using Rubrik to manage its 80% virtualized environment, including Windows applications. Benefits include:

- **50% management time savings:** "With our legacy solution, we spent 30 minutes per day managing our backups. Now we're only spending 15 minutes per day checking Rubrik."
- **90% reduction in data center footprint:** "We've eliminated our backup appliances by archiving to AWS with Rubrik and drastically reduced our data center footprint from 30U to 2U, which was very effective."
- **15% TCO savings:** "By switching to Rubrik, we will see 15% TCO savings over five years. We are thrilled because this will allow us to use our existing budget more effectively."
- **Seamless cloud archival to AWS:** "With our legacy solution, it would have been too costly to move to the cloud. Rubrik allows us to migrate to AWS and easily configure our SLAs. We also no longer need a secondary site for replication and have seen cost savings as a result."

- **Quick installation:** “We were impressed by how easy Rubrik was to set up. It took a third of the time to install compared to our previous solution. Additionally, configuring SLAs is very simple and VMs are automatically protected. This will help us eliminate the management complexity we were previously struggling with.”
- **Granular restores with Google-like search:** “With Rubrik’s Google-like search, we can restore files in seconds.”
